Local Students Explore the Wonders of Nature

Submitted by Merrylee Landau

Thanks to dedicated teachers, Los Perales Elementary School fifth graders learned hands-on science at a recent two-night/three-day science camp as part of the NaturalBridge residential outdoor science program in Sausalito. "There is paperwork involved and also they must get their students ready for the trip, both from an educational perspective and an emotional perspective," said Merrylee Landau. "Some students have not been away from their parents before. To see the students work both as individuals and as a group/team was amazing. They all participated in team building/bonding activities where they could not succeed as a group unless they involved everyone - the whole team. They all succeeded." Rheem and Camino Pablo Elementary School students will also attend the camp.
